

Robust grabs for excavators with revolutionary exchange system in a single device. As a new demand on site arises, the attachment can be exchanged and the new application can commence. Easy remounting of shells for excavating, landscaping, laying pipes, logging, rail track handling etc.

- ▶ **Efficiency:** only the shells are replaced; exchange is possible with only one person
- ▶ **Fastness:** easy exchange of the lynch pin from the change-over system within 4 minutes, no hydraulic work necessary
- ▶ **Robust technics:** compact design through the integrated rotator. Robust shell bearing with coexisting change mechanism

Clamshell buckets with exchangeable shells are available for

- ▶ excavators up to 8t: C08VE / T08VE / R08VE and more
- ▶ excavators up to 12t: C12VE / T12VE / R12VE and more

Close bucket and set it down. Mount the exchange support.

Remove the lynch pin from the change-over system.

Remove the change-over pin with extraction tool.

Position the bucket carrier over the new attachment and close the locking unit hydraulically.

Insert the change-over pin and fasten the lynch pin.

Remove the exchange support. Ready for use!
